PROFILE

Software developer and cloud architect with **4+** years of experience in cloud systems and client interactions, specializing in designing and implementing scalable solutions for complex business challenges. With expertise in navigating clients through complex technology landscapes, I ensure seamless adoption of resilient solutions that directly align with business objectives and yield measurable outcomes. I am authorized to work in the UK **without sponsorship** and can start in **four to six weeks**.

EXPERIENCE

Deloitte

Consultant

Toronto, Canada

December 2022 – Present

- Led workshops and collaborated with technical and non-technical stakeholders to design different **Azure** cloud architectures, ensuring alignment with client needs and driving successful technical implementations for Canada's largest E-commerce grocery retailer with **+3M** daily events
- Deployed **ETL** pipelines and Azure serverless functions in **C#/.NET** to integrate 3rd party systems such as **SAP**, **Salesforce** and **Ocado** in an event-driven microservices architecture
- Developed Azure and Salesforce proof of concepts (**POCs**) to validate solution viability and secure client buy-in, including test data setup, integrations, and success criteria
- Managed the change request (**RFC**) process for client feature implementations, coordinating with stakeholders to gather requirements, assess impact, and deliver approved changes while maintaining system stability
- Served as the technical escalation point, conducted root-cause analysis of incidents and implemented defect fixes to resolve production issues

Business Analyst

July 2021 – December 2022

- Provided technical input for **RFP/RFI** responses and proposals, highlighting implementation feasibility and scalability
- Designed and implemented a healthcare booking platform for a government client to process **+2000** patient records daily using **Salesforce** in a **model-view-controller** design pattern and **AWS SQS, SNS**
- Led the development of an internal social platform for executives, facilitating **+500** daily interactions across Deloitte's international offices
- Created and maintained clear, reusable technical documentation such as integration guides and architecture diagrams on **Confluence**, and tracked development tasks in **Jira**

TECHNICAL SKILLS

Languages: Python, C#, Java, JavaScript/TypeScript, Go, Apex, HTML/CSS, SQL, Arabic (C2), Turkish (B1)

Frameworks and Libraries: Node.js, React, .NET, React Native, Next.js, Spring Boot, HTMX

Tools: Azure, Salesforce, AWS, Jira, Confluence, Git, Selenium, MySQL, Vim

Certifications: Microsoft Azure Fundamentals, Salesforce Business Analyst, Google Generative AI Leader, AWS Cloud Practitioner (2025)

EDUCATION

Queen's University

Bachelor of Computer Science (Honours) in Software Design

September 2016 – May 2021

Kingston, Canada
